OPERATION INSTRUCTIONS

1. Connect the power cord to the projector and to an outlet.
2. Slide open the lens cover *(tab above lens)*.
3. Touch the power light button.
4. Wait 5-10 sec. for the power light to stop blinking and turn green.
5. Turn on your media source *(computer or other)*.
6. You many need to press a specific key combination on your computer to activate your computers external video port.
7. On most laptops hold down the FN key while pressing a key labeled CRT/LCD/ or LCD/VGA, a monitor icon or similar. *(See helpful hints for*

specific model key combinations.)

8. If this does not work, restart your computer. *(Make sure the projector is connected and on.)*
9. Press the source button to change if needed.
10. Use front release button to adjust the height as needed.
11. Use Keystone buttons to make picture square.
12. Zoom in/out to focus.
13. When finished, before unplugging, press the power button until it blinks.
14. When the power button turns off, the fan will stop. It is safe to unplug unit.
15. See Manual for more info.
